# SOME THINGS YOU SHOULD KNOW...

- 1. INFORMATION:** We strive to provide you with useful information to help you with bull selection. In addition to the data in this catalog, current weights and scrotal measurements will be available sale day.
- 2. COWHERD:** Our cows are not pampered! They graze on swaths and native grass through the winter until calving starts at the beginning of February. It makes sense to buy bulls from a cowherd that works for a living!
- 3. EPDs:** We believe that EPDs are a useful tool to help evaluate certain traits in our cattle, BUT... Quality cattle are more important than the numbers used to describe them.
- 4. HERD HEALTH:** The Windy Willows herd is on a herd health program with the South West Animal Health Centre, Swift Current, SK. All calves are vaccinated with Inforce 3 at birth and with MLV vaccine and Clostridial vaccine in June and again at weaning. All pregnant females are vaccinated annually with MLV for IBR, PI3, BVD and BRSV.
- 5. DISPOSITION:** We continue to get compliments about the disposition of our bulls from everyone who works with them. We are a family operation and disposition is as important to us as it is to you.
- 6. GUARANTEE:** Our goal is to provide you with quality bulls capable of getting your cows pregnant. If anything happens to the bull you purchase let us know right away! Our responsibility does not end after the sale!
- 7. CUSTOMER SERVICE:** We offer free delivery within 200 miles or \$75 off if you pick up your bull on sale day. If you have any questions, or concerns after the sale...Call us first, we want to help!

## WELCOME TO THE 17TH ANNUAL WINDY WILLOWS BULL & FEMALE SALE

Again, I am very, very proud to be able to continue to assist Michelle & Hillary in presenting their 17th Annual Bull & Female Sale. We communicate all the time and have become very close friends after the past few years losses. This year Roger and I helped Michelle out with selecting the bulls and females offered in the sale and gathering a game plan for the future of Windy Willow Farms.

When we all decided to have the Red Angus Dispersal Sale and the Mature Cow Dispersal Sale, the work load was to become easier for all. The support the family got was overwhelming with this hard-working cow herd dispersing to all new homes across Canada. Thank you again to the buyers, friends and family for your contribution to this event that surpassed all expectations.

To the offering, the bulls on offer were selected for calving ease and power bulls equally while having a good foot under them and offering different genetics this year for the commercial cattleman. These bulls are not pushed and built for longevity and foot quality. We have reduced the number of the bulls on offer as well this year as you have noticed so we can keep the popular two-year program continuing at the sale. The females as we have talked about before were hand selected by DBI and we feel this is the best set available for this event. Many top cows produced these progeny selling here today as you will see throughout the catalogue.

If you need any assistance, please contact Roger or myself or any of the sales staff or even better give Michelle or Hillary a call to discuss your needs.

*Mark Holowaychuk, DBI Livestock Ltd.*

# CARCASS DATA

In order to use body composition EPD's or ultrasound data to its full potential, a breeder must have an understanding of the ultrasound terminology. Several of the ultrasound measurements are comparable to the familiar carcass measurements. The data is simply collected on yearling bulls and heifers instead of market ready steers. Take a step back from looking at the numbers and become comfortable with the terminology.

## ULTRASOUND CARCASS MEASUREMENTS

### RIB FAT/BACK FAT

a measurement of fat cover in inches. It is the main trait that effects percent lean meat yield.

### RIBEYE AREA (REA)

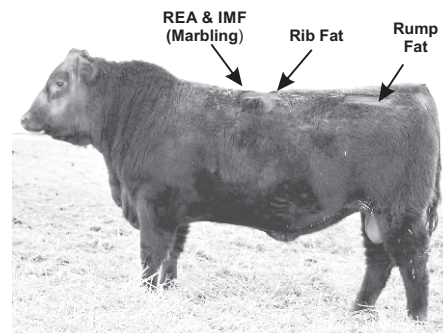

an area measurement of the loin or ribeye muscle reported in square inches.

### RUMP FAT

A measurement of fat cover over the rump reported in inches.

### INTRAMUSCULAR FAT (%IMF) MARBLING

a measurement of the amount of fat within the muscle (marbling).

## USING ULTRASOUND DATA TO SELECT BULLS

1. Fat levels, including marbling, will normally be higher in steers than in similarly fed bulls due to the lack of testosterone.
2. Carcass traits such as ribeye area (REA) and marbling (%IMF) are highly heritable, therefore using sires with high ultrasound scores for these traits will significantly improve carcass quality.
3. Significant premiums are being paid by packers for carcasses that meet high quality grade and yield grade standards. There are extra profits to be made!
4. Less backfat is not always better! Extremely low backfat bulls may sire steers with high yield grades, but they may be slow to finish. Their heifer counterparts may reach puberty later and have more difficulty milking, rebreeding and maintaining a short calving interval. On the other hand, overfat bulls may have reduced fertility.
5. Evaluate your cowherd, decide what kind of progeny you wish to produce and choose bulls with the ultrasound data to match your needs.

## VOLUME DISCOUNT

WE ARE OFFERING A VOLUME DISCOUNT FOR 5 OR MORE BULLS, BLACK, RED OR WHITE.  
THE DISCOUNT IS 5% FOR 5 BULLS, 6% FOR 6 BULLS AND SO ON, UP TO 10% FOR 10 OR MORE BULLS.

WINDY WILLOWS RESERVES THE RIGHT  
TO DRAW SEMEN FOR IN-HERD USE ON  
ANY BULL IN THE SALE, AT THE BUYER'S  
CONVENIENCE AND OUR EXPENSE.

## WHAT THE NUMBERS MEAN!

Windy Willows Farms have been performance testing our herd on the Canadian Angus Performance Program (CAP) since its inception.

**BW** – actual weight of calf taken within 24 hrs of birth.

**ADD** – Age of Dam at time of calving

**Weaning WT (WW)** – the calf weight taken at weaning and adjusted to 205 days of age.

**Yearling WT (YW)** – the weight taken at end of test and adjusted to 365 days of age.

**What is an EPD?** – An EPD is a measure of the average difference in a trait of the progeny of one sire from average of the progeny of other sires.

**BW EPD (in lbs)** – a larger EPD indicates a heavier average birth weight for calves by that bull.

**WW EPD (in lbs)** – a larger EPD indicates a heavier average weaning weight for calves sired by that bull.

**YW EPD (in lbs)** – a larger EPD indicates heavier average yearling weight for calves sired by that bull.

**MILK EPD (in lbs)** – a larger EPD indicated heavier calves from a bull's daughters due to their milk production.

**AVERAGE EPD** – It is helpful to know the average EPD's for all 2019 Calves.

2019 Black Average BW:+2.0 WW:+47 YW:+83 MILK:+22

2019 Red Average BW:+1.2 WW:+35 YW:+60 MILK:+22

## CALVING EASE & CALVING EASE ELITE BULLS

The bulls have been rated for calving ease ability based on the BW EPDs and what we know about the bulls themselves and their dams.

**CALVING EASE ELITE** – recommended for heifers

**CALVING EASE** – below breed average for birth weight, recommended for cows or heifers

**NO CALVING EASE RANK** – recommended for cows

## BULL WARRANTY

We guarantee to provide you with a sound, fertile bull capable of servicing a reasonable number of cows. In the event that your bull is a non-satisfactory breeder the seller will not, under any circumstances, be responsible for more than the original selling price of any bull or female sold in the sale. The consignors will not provide replacement or credit for physical injury or mismanagement. Therefore we stress the importance of insurance on your bull. An insurance agent will be available on sale day.

## TERMS & CONDITIONS

**TERMS:** The terms of the sale are cash or cheque payable at par. Settlement to be made immediately after the completion of the sale. The right of property shall not pass until after settlement is made. All settlements must be made with the clerk of the sale before any cattle will be released. All monies are Canadian funds.

**BIDS:** Every animal entering the sale ring will be sold to the highest bidder.

**DISPUTES:** In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision of all disputes is final.

**ANNOUNCEMENTS:** All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to any such announcements.

**PURCHASER'S RISK:** Each animal becomes the risk of the purchaser as soon as sold.

**INSURANCE:** Insurance can be arranged for through the sales clerk.

**CERTIFICATE OF REGISTRATION:** Each animal will carry a Registration Certificate issued by the Canadian Angus Association. A certificate of registry, duly transferred, will be furnished to the buyer after payment has been made.

**ACCIDENTS:** Although every precaution will be taken to protect the safety and comfort of buyers, neither the sale management nor the auctioneer assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss of property.

**LIABILITIES:** All persons attending the sale do so at their own risk and sellers assume no liability, legal or otherwise, for any accidents occurring in or about the premises.

**EXPORT TESTING:** Required health certificates for cattle being exported will be provided.

# Welcome

Life is about change; some changes are harder to accept than others. We were dealt a change last Thanksgiving that has pushed us to deal with the unexpected. It has taught us to look at life differently, appreciate the small things but to go forward with the same love for our cows as Collin showed us. Even though Collin is no longer with us, he still provides much needed guidance. The genetics and breeding of this years offering were still under his direction. Hillary and I are very pleased with the set of bulls and heifers that we have developed. Life at Windy Willows may have taken a hard turn and some days we struggle but the quality of our bulls has remained the same.

2019 was a challenging year in many aspects...unpredictable weather, delayed harvest, etc. Our bulls were weaned 3 weeks later than usual. Once they were weaned, feeding them became a new priority for Henry and I. We have learned a lot in the past few months and we have been able to achieve our goals for the bulls we have to offer. The bulls are on a TMR of 18% Beef Pellet, barley silage, rolled barley and chopped hay. We would like to thank all those that have helped us with guidance and advice along the way.

We have a strong set of yearling bulls that offer a good selection of calving ease, calving ease elite and cow bulls. Walkerbrae Warrior sons top the scale for performance for cow bulls. We have feature bulls that are sons of Really Windy, Stunner and Focal Point that are exceptional calving ease bulls. The total number of yearling bulls offered is less than previous years because we made the decision to hold some over as 2-year-olds. Next year's offering will have a larger selection of extra aged bulls. We are also pleased with the selection offered out of our 2-year-old pen. They have been selected for growth, calving ease and temperament.

The 12 open heifers offered are from the very top of our heifer pen. We do not intend to keep as many heifers as we have in the past, so this is an opportunity to purchase top Windy Willows genetics.

We would like to thank our management team and Mark Holowaychuk. The many phone calls, visits and texts have provided much guidance, support and tremendous encouragement to keep us focused.

To our sale partners, Garner, Lori, BJ, Kylie & Griffin thank you! Not only are you great sale partners, but amazing friends and neighbors.

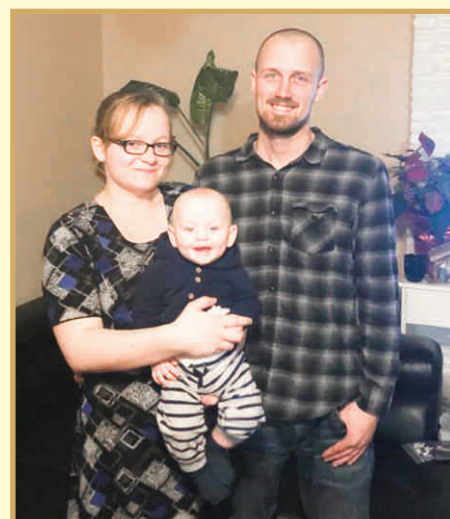

Hillary and I would like to thank our family and close neighbors that arrive with a quick text or phone call to help out in any way needed. Our journey has been difficult and it won't get any easier but with an amazing team of family, friends and neighbours each day looks a little brighter at Windy Willows.

**See you all Tuesday, April 7. If sale day doesn't work, please join us for steak supper Monday, April 6 at the sale barn!**

Collin ♥ Michelle & Hillary

We were very pleased when we purchased Warrior as the High Selling bull from the Sandy Bar cowherd dispersal sale. His sons at the Shortgrass Bull Sale averaged over 10,000 and they have not disappointed us here. The Warrior progeny are very uniform, with exceptional growth, eye appeal and correctness. Warrior himself had a great foot under him and he sure has passed it along to his calves.

## SPRUCE VIEW CURRENCY 108E

A new sire group on offer, Spruce View Currency 108E was the high selling bull at the 2018 Spruce View Bull Sale. When Collin and I toured the bulls at Spruce View we were impressed by Cash's (as we refer to him) depth and thickness, upon arrival at Windy Willows he did not disappoint. He has averaged 73 lbs for BW on his bulls at the farm. Calving ease sire group.

A couple years ago when we had a few bulls go down, we were able to purchase Active Duty by private treaty from KBJ and Dream Makers Angus. He did what we needed that year and continued to produce very moderate framed bulls with calving ease built in. This is also a new sire group for our repeat buyers.

One of two KG Focal Point 2013 sons in the offering. We have always admired what he has done for our program and his females have been keepers. 49G is a out of a S Titlest 1145 daughter, that is still producing at Windy Willows. His grandam 6B sold to Prairie Ace Angus from Medicine Hat this past year. Another calving ease bull without giving up growth!

Our second and final KG Focal Point 2013 son in the offering and he is a calving ease elite bull out of a young Sitz Investment daughter. Great data on this bull across the board. This bull is super clean fronted with a good foot under him; travels in the pens how you want to see them. Good hair and straight top on this calf.

Interlock 62G is one of Hillary's bulls in the offering. Erica 96Y, was the first female Hillary bought from her dad's herd. She was shown at a young age and has been a no miss producer with daughters in production at Connor Watson's and OBI/Sprucefield Farms. 62G is another well made, good haired SAV International 2020 son. This bull is a very deep sided, big topped calf, large amount of muscle throughout with loads of hair. A real total package here!

In our search for a Red Angus calving ease bull, we ended up at Kenray Ranch. We partnered with Sheldon to purchase him and have been pleased not only with Staunch but with the partners that became friends. Staunch is a bull we have really liked from the day we obtained him. He sired us a very consistent set of progeny, mostly calving ease with a great hair coat. At our Dispersal Sale in December, Staunch was purchased by our friends Russ & Cindy Sibbald at Lazy RC Ranch.

The only Minburn Active Duty 48B female in the sale and she is a good one. Loads of hair, very deep sided female whose dam went to Danny & Treena Blake this past December. Don't let her young age fool you.

The youngest female in the offering, 224G is out of a very good KBJ Standard female that went to Riley Straub and the ever popular Big Bang 169B herdsire. 224G is a very fancy fronted female that will make your front pastures.
